Amendment Dated: March 23, 2005

<u>AMENDMENTS TO THE CLAIMS</u>

Please amend the claims as follows:

LISTING OF CLAIMS:

- 1. (Original): A process for the production of L-ascorbic acid comprising:
- (a) contacting an enzyme with a substrate which is selected from the group consisting of L-gulose, L-galactose, L-idose, and L-talose; and
- (b) isolating L-ascorbic acid from the reaction mixture, wherein said enzyme has the amino acid sequence of SEQ ID NO: 2 or an amino acid sequence that is 90% identical thereto with the activity to produce L-ascorbic acid.
- 2. (Original): A process for the production of L-ascorbic acid with an enzyme having the amino acid sequence of SEQ ID NO: 2 or an amino acid sequence that is 90% identical thereto, with the activity to produce L-ascorbic acid, whereby L-ascorbic acid is produced from a substrate which is selected from the group consisting of L-gulono-1,4-lactone, L-gulonic acid, L-galactono-1,4-lactone, L-galactonic acid, L-idono-1,4-lactone, L-idonic acid, L-talono-1,4-lactone, and L-talonic acid.
- 3. (Original): A process for the production of L-gulono-1,4-lactone or L-gulonic acid with an enzyme having the amino acid sequence of SEQ ID NO: 2 or an amino acid sequence that is 90% identical thereto, with the activity to produce L-gulono-1,4-lactone or L-gulonic acid, whereby L-gulono-1,4-lactone or L-gulonic acid is produced from L-gulose.
- 4. (Original): A process for the production of L-galactono-1,4-lactone or L-galactonic acid with an enzyme having the amino acid sequence of SEQ ID NO: 2 or an amino acid sequence that is 90% identical thereto, with the activity to produce L-galactono-1,4-lactone or L-galactonic acid, whereby L-galactono-1,4-lactone or L-galactonic acid is produced from L-galactose.
- 5. (Currently amended): A process according to <u>claim 2</u> any one of <u>claims 1 to 4</u> comprising (a) contacting the enzyme with the respective substrate and

U.S. National Appl. based on PCT Appl. No. PCT/EP2003/010489 Amendment Dated: March 23, 2005

- (b) isolating the product-which is selected from the group consisting of L-ascorbic acid,-L-gulono-1,4-lactone, L-gulonic acid, L-galactono-1,4-lactone, and L-galactonic acid from the reaction mixture.
- 6. (Currently amended): A process according to <u>claim 1</u> any one of <u>claims 1 to 5</u>, wherein the process is conducted for 1 to 120 h at a pH of about 1 to about 9 and at a temperature of about 13°C to about 45°C.
- 7. (Original): A process according to claim 6, wherein the process is conducted at a pH of about 2 to about 8 and at a temperature of about 18°C to about 42°C.
- 8. (Currently amended): <u>A Use of Enzyme B of G. oxydans DSM 4025 in a process for producing L-ascorbic acid comprising contacting from a substrate which is selected from the group consisting of L-gulose, L-galactose, L-idose, L-talose, L-gulono-1,4-lactone, L-gulonic acid, L-galactono-1,4-lactone, and L-galactonic acid with Enzyme B of G. oxydans DSM 4025 and isolating L-ascorbic acid from the reaction mixture; wherein Enzyme B has the following physico-chemical properties:</u>
 - (a) molecular weight of about 60,000 Da on SDS-PAGE;
- (b) substrate specificity for primary and secondary alcohols and aldehydes;
 - (c) pH-stability at pH of about 6 to about 9;
 - (d) pH-optimum at pH of about 8.0; and
 - (e) inhibited by Cu²⁺, Zn²⁺, Mn²⁺, Fe²⁺, and Fe³⁺.
- 9. (Currently amended): <u>A Use of Enzyme B of G. oxydans DSM-4025 in a process for producing L-gulono-1,4-lactone or L-gulonic acid comprising contacting from L-gulose with Enzyme B of G. oxydans DSM 4025 and isolating L-gulono-1,4-lactone or L-gulonic acid from the reaction mixture, wherein Enzyme B has the following physico-chemical properties:</u>
 - (a) molecular weight of about 60,000 Da on SDS-PAGE;
- (b) substrate specificity for primary and secondary alcohols and aldehydes;

U.S. National Appl. based on PCT Appl. No. PCT/EP2003/010489 Amendment Dated: March 23, 2005

- (c) pH-stability at pH of about 6 to about 9;
- (d) pH-optimum at pH of about 8.0; and
- (e) inhibited by Cu²⁺, Zn²⁺, Mn²⁺, Fe²⁺, and Fe³⁺.
- 10. (Currently amended): A Use of Enzyme B of G. oxydans DSM 4025 in a process for producing L-galactono-1,4-lactone or galactonic acid comprising contacting from L-galactose with Enzyme B of G. oxydans DSM 4025 and isolating L-galactono-1,4-lactone or galactonic acid from the reaction mixture, wherein Enzyme B has the following physico-chemical properties:
 - (a) molecular weight of about 60,000 Da on SDS-PAGE;
- (b) substrate specificity for primary and secondary alcohols and aldehydes;
 - (c) pH-stability at pH of about 6 to about 9;
 - (d) pH-optimum at pH of about 8.0; and
 - (e) inhibited by Cu²⁺, Zn²⁺, Mn²⁺, Fe²⁺, and Fe³⁺.
- 11. (New): A process according to claim 3 comprising (a) contacting the enzyme with the substrate and (b) isolating the L-gulono-1,4-lactone or L-gulonic acid from the reaction mixture.
- 12. (New): A process according to claim 4 comprising (a) contacting the enzyme with the substrate and (b) isolating the L-galactono-1,4-lactone or L-galactonic acid from the reaction mixture.
- 13. (New): A process according to claim 2, wherein the process is conducted for 1 to 120 h at a pH of about 1 to about 9 and at a temperature of about 13°C to about 45°C.
- 14. (New): A process according to claim 3, wherein the process is conducted for 1 to 120 h at a pH of about 1 to about 9 and at a temperature of about 13°C to about 45°C.

U.S. National Appl. based on PCT Appl. No. PCT/EP2003/010489

Amendment Dated: March 23, 2005

15. (New): A process according to claim 4, wherein the process is conducted for 1 to 120 h at a pH of about 1 to about 9 and at a temperature of about 13°C to about 45°C.

- 16. (New): A process according to claim 5, wherein the process is conducted for 1 to 120 h at a pH of about 1 to about 9 and at a temperature of about 13°C to about 45°C.
- 17. (New): A process according to claim 11, wherein the process is conducted for 1 to 120 h at a pH of about 1 to about 9 and at a temperature of about 13°C to about 45°C.
- 18. (New): A process according to claim 12, wherein the process is conducted for 1 to 120 h at a pH of about 1 to about 9 and at a temperature of about 13°C to about 45°C.
